

Technical Specifications

EASY 9

SPACIOUS & USER-FRIENDLY PICK-UP COMPARTMENT

The pick-up window of the Easy line is positioned at an ergonomic height of 90 cm. It opens and closes automatically, offering a seamless and convenient user experience.

EASY 9 + SATELLITE

REAL-TIME DATA SERVICE

Gigasystems provides real-time vending machine management via a web-based platform. You can monitor live sales data and check the stock level of each product at any time.

MULTI-PRODUCT DISPENSING

Our internal lift system is designed for ultra-gentle product handling. An integrated conveyor inside the lift ensures smooth transportation. When multiple items are in the shopping cart, they are dispensed together in a single delivery.

Technical Specifications

EASY 14

SECURE SLIDING PANEL FOR MAXIMUM PRODUCT SAFETY

A vandalism-proof sliding panel seals the shelves hermetically whenever the pickup compartment is open. An additional privacy panel can be installed to conceal a dedicated shelf for age-restricted products – ideal for compliant sales of items like alcohol or tobacco.

EASY 14 + SATELLITE

PATENTED DISPENSING SYSTEM FOR MAXIMUM FLEXIBILITY

All Gigashops feature unmatched flexibility for managing a wide range of SKUs. The patented MAGEX conveyor dispensing system adapts to any product size or shape and can even merge adjacent channels to deliver oversized items. Each lane can be individually configured, allowing for efficient inventory management across your entire product portfolio.

SCALABLE SATELLITE MODULE

The satellite module operates under the control of a master vending unit and functions as a fully equipped Gigashop—just without the touchscreen interface. By combining one master machine with multiple satellite modules, entire rooms can be transformed into fully automated retail spaces. Perfect for modular rollouts or high-traffic locations.

Standard Features

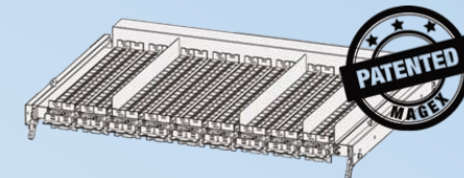

- Lift-based delivery system with 6 shelves
- Payment terminal with integrated card reader
- Thermal receipt printer
- 22" HD touchscreen
- Industrial-grade quad-core computer
- Operating system installed on 32 GB SSD
- Secured product delivery area with automatic door opening
- Athermal and shatterproof glass
- Internal control console with self-diagnosis and error resolution system
- LED lighting
- Fully customizable shelf configuration (height, depth, number of positions)
- Armored locking system
- Data management and analytics display system
- Temperature control and monitoring

Optional Features

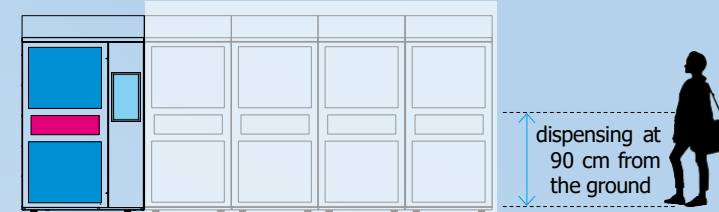

- 5G-Router
- Banknote reader/ Coin changer
- Barcode Scanner
- QR Code Scanner
- RFID loyalty card system
- Age verification system
- Weatherproof outdoor enclosure
- Cooling system

MAGEX Drawer

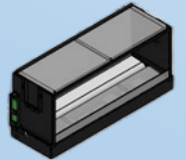

- Magex patented transport system since 2006
- It adapts to every type of product, also allowing you to join adjacent aisles to handle larger products both in width and depth
- easily configurable at any time without the need for mechanical tools
- Variable weight patent option to sell products in the same aisle with different weights
